SUMMARY:

Full-stack web developer who understands requirements and builds practical solutions. Experienced in handling backend logic, integrations, and features that are actually used.

EXPERIENCE:

Full Stack Web Developer

Enlightened I.T Solutions (Sept 2025 - Present)

- Conducted complete R&D for building a fleet tracking GPS software, including designing the High-Level Design (HLD) and Low-Level Design (LLD), laying the foundation for a scalable and efficient tracking system
- Improved the company's CRM with follow-up counts, service tracking, search/sort, and form validation. Helping track and close sales faster, boosting speed by 25% and UX by 40%
- Designed and built a 41-page high-converting website for the company's client, who sells and exports medical equipment to countries like Dubai and South Africa

Full Stack Web Developer (Intern)

Symbiosis System Pvt Ltd (May 2024 – June 2024)

- Built the Inward and Order modules in an inventory system, helping the company deliver a faster solution to their client. Improving UX by 40% and overall speed by 20%
- Developed a subscription countdown system (10 days → 0) so the company could automatically track expiries increasing revenue and saving hours of manual follow-ups
- Added auto-restriction after subscription expiry, ensuring clients can't use the software without renewal. Reducing manual checks and boosting the company's control over renewals

PROJECTS:

1.Eventify | React.js, Express.js, Mongodb, Cloudinary [\[Link\]](#)

- Developed a full-stack event ticket management system
- Implemented role-based multi-user authentication using JWT for secure access control
- Integrated Razorpay to handle paid event registrations and refund workflows securely

2.Imaginify | Next.js, Mongoose, Mongodb, Cloudinary, Git [\[Link\]](#)

- Developed an AI image editor using Cloudinary API to restore images, remove/recolor objects
- Integrated Stripe for a credit-based payment system with tiered plans, enabling smooth transactions
- Implemented secure authentication using Clerk to manage user access
